

# VIRNECT

## Era of Coronavirus

Revolutionize  
industrial site issues  
through remote  
collaboration

Q3 2020

[contact@virnect.com](mailto:contact@virnect.com)

**VIRNECT**

# How safe is your worksite?

Harsh industrial site results inefficient performance

5 casualties occur daily due to the industrial accidents\*

Low labor productivity compared among OECD countries (28<sup>th</sup> out of 36 countries) \*\*

Risk of falling and electric shock

Joint responsibility is required between subcontractor and main contractor

Missing/injury/death due to explosion in chemical factories

Inefficient communication  
Inadequate response in worksite

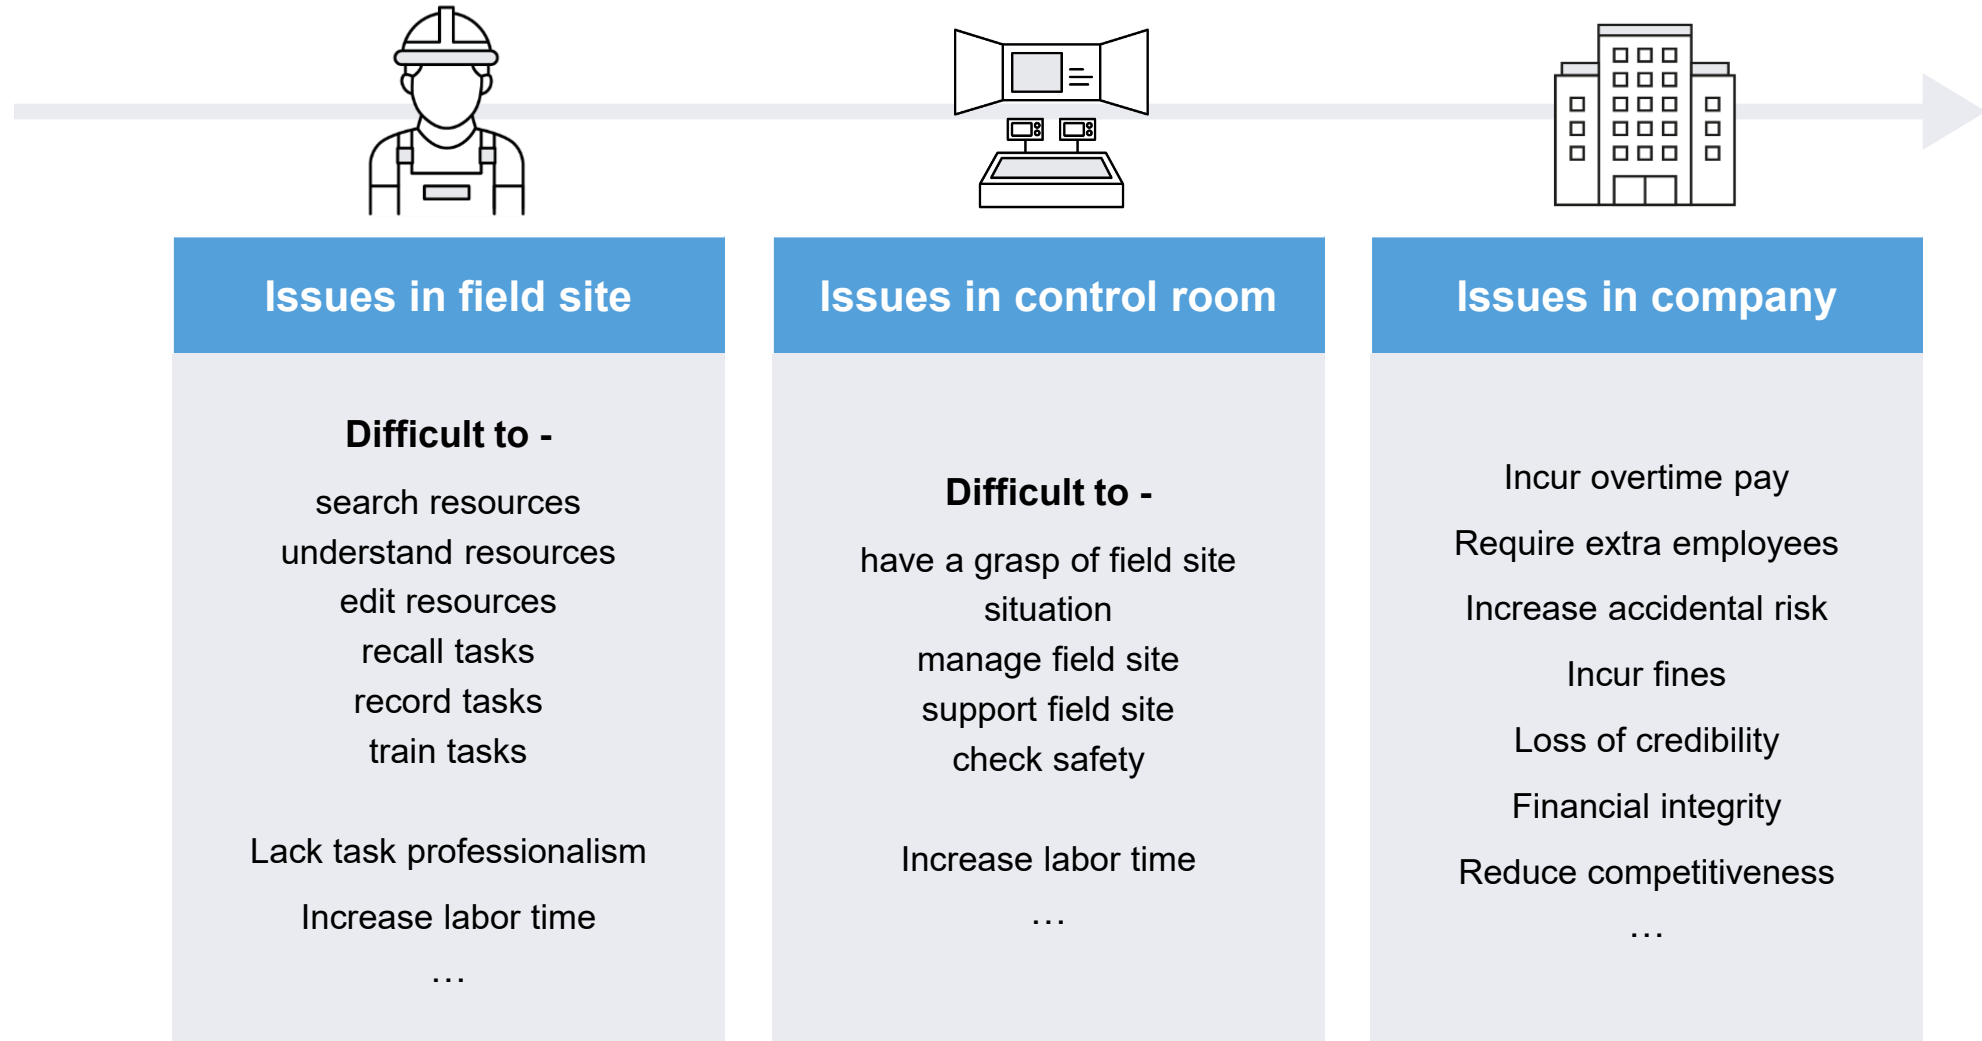

Inefficient inspection  
Manual records

Inefficient worksite management  
Lack of safety training

# What is the cause?

Issues in the field site,  
control room  
and company

# DT·AR technology can resolve your issues

Realize non-face-to-face  
work experience with  
our core technology

**Digital Transformation, DT** : Digitization of analog information

**Augmented Reality, AR** : Technology to visualize the digital information in reality

\*VIRNECT Remote use case – Equipment O&M using Smart glasses

- **Safety Insight**

Augment safety information by  
creating work safety checklist,  
danger zone alert etc.

▶ **Guarantee safety and  
reduce work accident**

- **Operation Insight**

Augment task information by creating  
task procedure list, equipment layout,  
operation data etc

▶ **Easier to comprehend  
tasks and increase work  
efficiency**

- **Business Insight**

Quick and precise understanding  
of situations in field sites to resolve  
issues and increase profit

▶ **Reduce expense and  
decision-making time**

# VIRNECT Solution

Era of Coronavirus,  
Resolving industrial  
site issues through  
remote collaboration

## Field site

Perform effective field site work

**Remote Field site**  
Real-time remote collaboration

**AR SDK**  
Equipment detection / tracking

**View**  
Augment equipment / task information

## Control room

Perform effective field site support  
/ understand situation

**Remote Control room**  
Real-time remote collaboration

**Twin**  
4D field site monitoring

**Make**  
Create AR training / task materials

**Platform**  
Guaranteed service linkage/stability/scalability

Collaboration  
data

Status data

Task data

# VIRNECT Solution

The quick agreement and accurate instruction between the users increase the task performances.  
Reduce business trips of specialists and reduce the downtime to increase overall operation efficiency.

Work accuracy  
**Increased by 90%**

(Augmented Reality (AR) Trends: The Past, Present & Future Predictions For 2019, Towards Data Science, 2019)

Experts' inspection cost  
**Reduced by 90%**

\$200K → \$20K  
Use of VIRNECT Remote  
by Hanwha Total Petrochemical Co., Ltd

# VIRNECT Solution

Turn experts' know-how into AR contents without the need of coding skills.

When comparing with the existing AR content development method, it is much easier to create, distribute and perform maintenance at a cheaper price.

# VIRNECT Solution

Viewer visualizes the AR content created from the Make product.

The task details can be quickly and intuitively understood, which lead to faster process of handling tasks.

Time consumption of  
assembly process  
**Decreased by 35%**

Inspection time  
**Decreased by 96%**

Why Every Organization Needs an AR Strategy,  
Harvard Business Review, 2017

# VIRNECT Solution

 **Twin** | Data linkage virtual monitoring & simulation system

Install 3D monitoring system at the field site and increase overall operational insight.

Visualization of data analysis and real-time field site data can improve overall task processes.

Time consumption of assembly process  
**Decreased by 35%**

Work injury  
**Decreased by 70%**

Augmented and Virtual Reality in Operations  
(Capgemini Research Institute, 2018)

# VIRNECT Solution

## AR SDK | Object learning, detecting and tracking AR SDK

It is an AR engine that quickly learn, detect and track objects.

The AR engine's flexible applicability and stability allow the development of AR services suitable for real-world environments.

Target detection speed  
**Within 15ms**

Target detection accuracy  
**More than 90%**

In-house testing

# Recent excellent use case

Implementation of VIRNECT Remote for regular maintenance of Hanwha Total's factory in Daesan

1,

**Reduce maintenance time through quick support to field sites**

Allows quick tech support during a difficult period to travel eg. Covid-19

2,

**Reduce travel expenses through remote support solution**

\$200,000 (Travel expense for 3 people + 2 week quarantine cost)

**\$2,000 (Cost for 2hr of tech support)**  
+ \$18,000 (VIRNECT Remote cost)

3,

**Introduce non-face-to-face service and refurbish company identity**

# VIRNECT Service

Accurate diagnosis of customer's problems and propose perfect fit solutions

## Consultation

- ✓ Analyze work & environment
- ✓ Analyze economic feasibility
- ✓ Analyze stability

## Seminar & Education

- ✓ Technology introduction
- ✓ Introduce successful use cases
- ✓ Experience & train products

## Proof of concept (PoC)

- ✓ Minimal use of features
- ✓ Review possibility of implementation
- ✓ Verify effectiveness of implementation

## AR, DT content production

- ✓ Digital transformation of information
- ✓ 3D scanning, modeling, transformation
- ✓ AR content planning & production

# VIRNECT

Industry leading  
AR company

**Mission** We strive to provide a safer industrial environment, maximized work efficacy, and the best convenience to our clients.

**Vision** We are the most customer-centric company, capable of finding the right solutions for our customers.

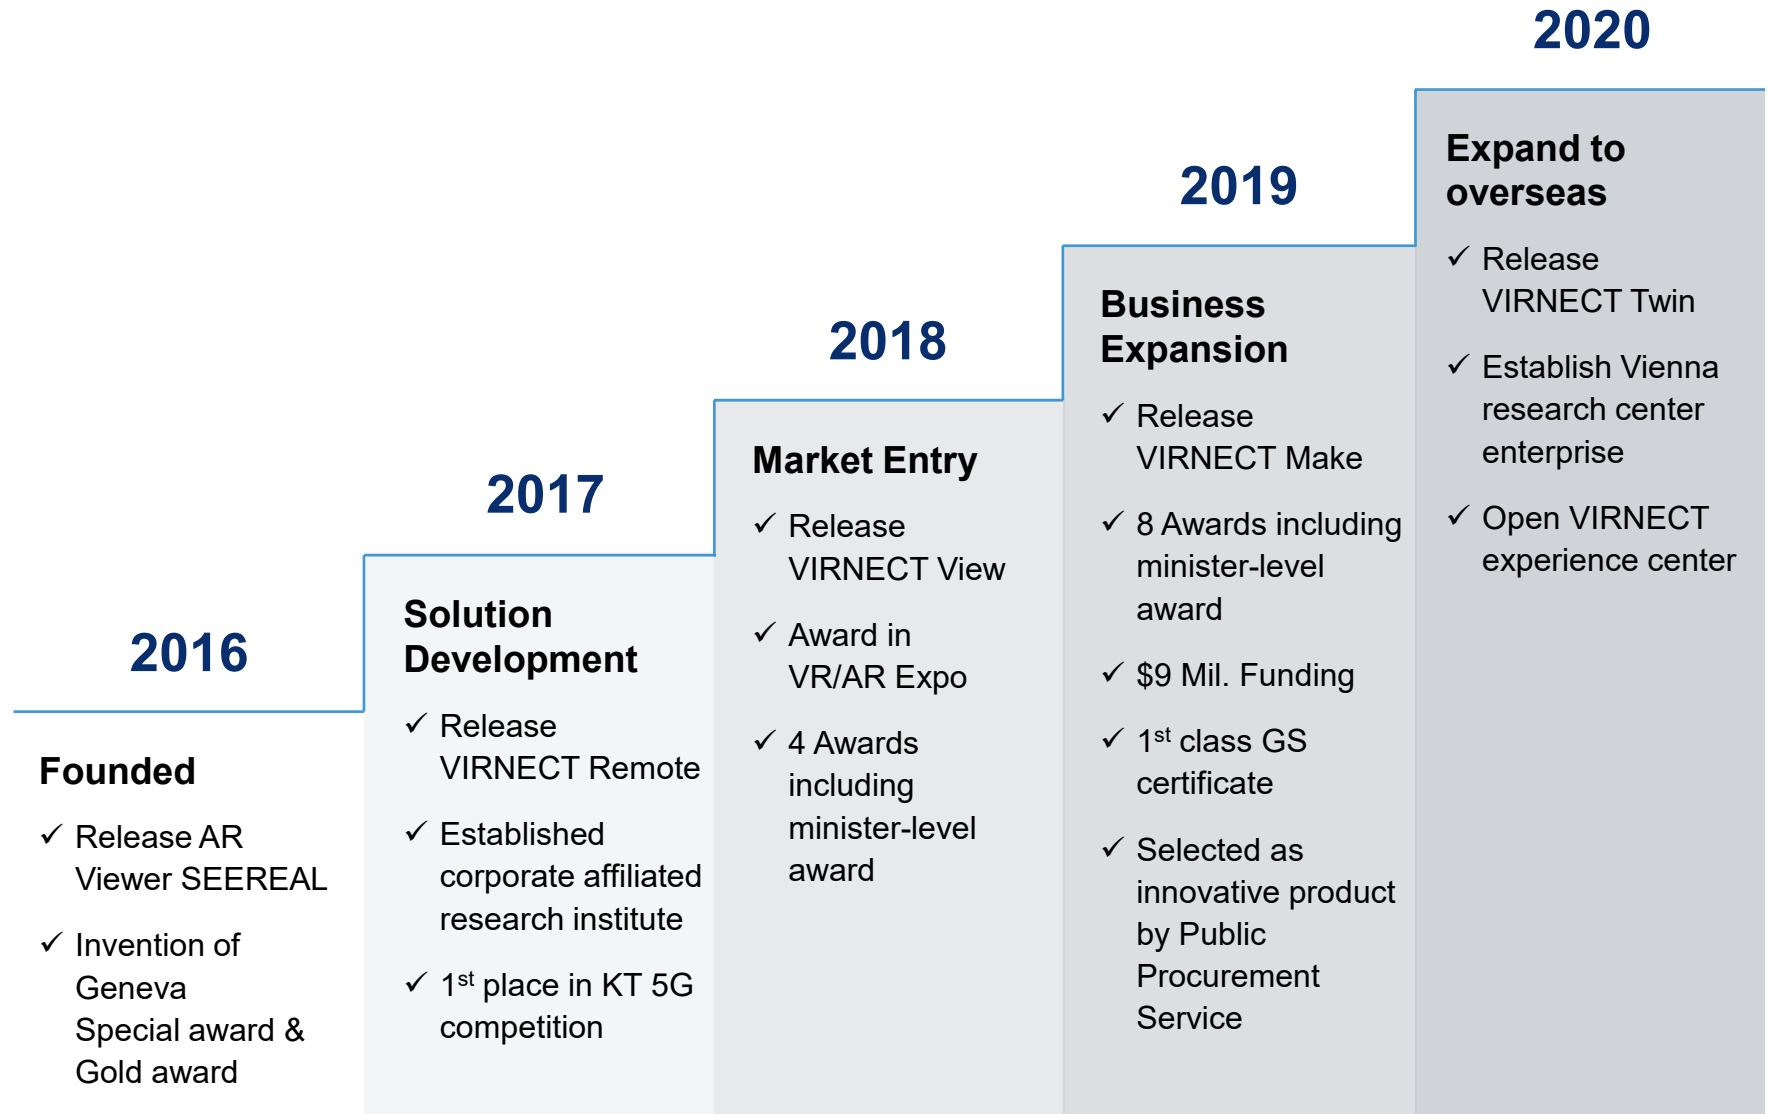

※ **88 employees** (20 Top-tier Master and PhD graduates, 45 R&D, 5 QA)  
**more than 100 research papers** (Top in domestic market)  
**\$9 Mil. Funding** (Series A round. Top in domestic market)  
**Compound Annual Growth Rate (CAGR) 75.4%**  
**Company review rate 4.15** (Out of 5 points. 'Work · Life Balance' Excellent company)

\*Based on end of Aug 2020

# Customer Referrals

“ VIRNECT Solution contributed greatly to our company’s Smart Factory platform development.

**HYUNDAI STEEL**

“ VIRNECT Remote is actually very helpful in working with our overseas production sites.

**LG Chem**

“ The implementation of VIRNECT Solution supports enhancement of productivity and sharing of information for fields of developing industries.

**DOOSAN**

“ The highly reliable object detection feature of VIRNECT AR SDK can provide industrial worksites with a platform for managing measurement information.

**kt**

“ VIRNECT Solution provides a platform of systematic information management and optimal safety management, even for areas requiring high reliability.

**Korea Atomic Energy Research Institute**

“ This is a powerful tool that allows quick collaboration of facility maintenance without the limitations of space and time

**OCI**

“ The AR solution applied to facility maintenance provided an easier understanding of work and improved work efficiency.

**SK C&C**

“ The VIRNECT AR Solution applied for worker inspections highly improved customer satisfaction.

**SAMSUNG SDS**

“ The world-class local AR specialized company VIRNECT’s core solution surely has its own selling point. It will become an essential partner for increasing industrial productivity.

**SEOILE&M**

**Redefine  
your problems  
into opportunities with  
VIRNECT Solutions.**
